

Fire Department  
*Joseph L. Donovan, Fire Chief*

355 South West Street  
Post Office Box 17  
Jackson, Mississippi 39205  
Telephone 601-960-1392

August 6, 1993

The Jackson Fire Department has been using your products for approximately two years and our Department is very satisfied with the results of your products. The Oil Gator is very easy to apply and work into fuel and oil spills. Clean-up time at hazardous material incidents has been greatly reduced through the use of your products. Our Department has had successful results with the use of Acid Gator and Cell-U-Sorb. We are presently using more of the Oil Gator than any of the other products. Oil Gator performs with good results on any type of roadway, parking lot, concrete and asphalt surfaces.

We would recommend the Gator products for use by any agency that deals with the initial response to or clean-up phase of hazardous material incidents.

Respectfully,

J. D. Cooper, Division Fire Chief  
Human Resources Division

Note from GATOR INTERNATIONAL: Jackson Fire Department is still using Gator products.  
The picture displayed below was taken Sept 14, 2000.
