Dear Ms Wain,

OIL GATOR is sold under the Enretech label in Australia. All Enretech 1 is manufactured in Jackson, Mississippi, USA and distributed by **INDUSTRIAL FLOORING SUPPLY 800-225-8836** www.FASTCUREFLOORS.com or info@fastcurefloors.com

LANDFILL DISPOSAL OF SPENT SORBENT MATERIALS

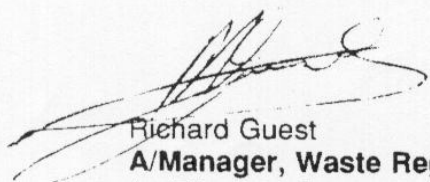

I refer to your letter dated 2 february 1996 regarding the above.

Based on the information provided, the EPA concurs that spent Enretech is suitable for disposal to landfill when used to sorb biodegradable hydrocarbon such as light to medium fraction petroleum hydrocarbon.

However, liquids sorbed onto Enretech must not be released under compression that might occur during routine landfill operation. This may be demonstrated, prior to disposal, by standard test methods such as the Liquid Release Test (USEPA method 9096) or Paint Filter Liquids Test (USEPA method 9095).

Presence of any scheduled chemicals in the spent Enretech must not exceed the levels prescribed in the Chemical Control Order issued under the Environmentally Hazardous Chemicals Act 1985.

Yours sincerely

Richard Guest
