

- \* All Natural
- \* Non-toxic
- \* Biodegradable

- \* Performance range:  
pH of 4.5 plus
- \* Effective Temperatures  
40°F-120°F (5°C-50°C)

# OIL GATOR®

## Natures Way to Bioremediate Hydrocarbons

Oil Gator is an "ALL NATURAL" biocatalyst. Oil Gator does NOT contain any manmade, cultured or genetically altered micro-organisms. Oil Gator contains all the natural ingredients necessary to accelerate the indigenous microbes to a point where they will rapidly degrade unwanted hydrocarbons. Oil Gator uses nature's methods and materials to control and remediate hydrocarbons. No harm will ever be done to the environment by the use of Oil Gator.

### BENEFITS

- Comes in a 30 pound bag for ease of handling and storage.
- Absorbs up to six times its weight in oil or oil-based products.
- Lightweight - which will lower the cost of transportation.
- Ground cleaning by accelerating bioremediation.
- Stops leaching of spills into the soil or groundwater.

### GOLF COURSE APPLICATIONS

**Oil Gator biodegrades hydrocarbons on golf courses, even in the presence of HERBICIDES, PESTICIDES AND FUNGICIDES. Herbicides and pesticides, in *diluted concentrations*, such as you would have if the herbicide or pesticide were being applied in a golf course application will not significantly inhibit the micro-organisms in Oil Gator. Oil Gator will degrade the unwanted hydrocarbon.**

**Oil Gator will degrade hydrocarbons in the presence of *diluted concentrations* of fungicides. Fungicides present in the soil at strengths necessary to kill fungal growth in St. Augustine grass will slow the bacterial growth. However, Oil Gator will recover and continue to degrade the unwanted hydrocarbon which has been absorbed.**

NOTE: If you are dealing with the spill of concentrated pesticide, herbicide or fungicide, it is recommended that you encapsulate and solidify the liquid with Oil Gator and dispose of it in accordance with local environmental regulations.
